

## Portfolio

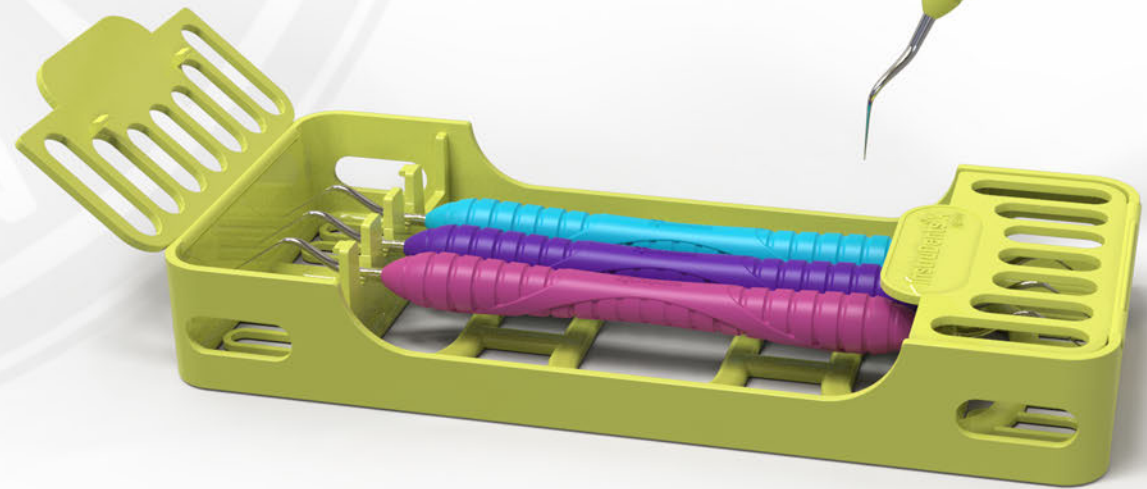

Hello,

My name is Clément Coletto.  
I'm a french Industrial & Product Designer, Creative Consultant.  
I have over 14 years of experience, working on various types of projects, for clients all around the world. I've been a Design Manager in China for over 6 years and I'm now fully working as independent. I always consider projects in their globality, also paying attention to dimensions beyond strict design perspectives (technic, production, economy, marketing, branding, business model, evolution, etc.) Together, we can create original and relevant products that stand out in the existing market, giving them the best chances to succeed.

Here is a small selection of my work.

Enjoy!
